2017 Retail Price List

One year guarantee on all
Prairie hardy shade trees

Seasonal Business Hours
April – October
Highway 16 E & Boychuk Drive
Ph: 306-477-0713    Fax: 306-477-0795
www.lakeshoregardencentre.com

Revised: February 2017

Prices range from $99.99 - $189.99. Prices are based on both size and species of tree. Trees range in height from approximately 6ft to 10ft.

For larger, specimen trees please inquire with the sales staff.

**Prices and availability subject to change without notice**

**Planting Instructions**

Check your planting location for drainage before planting. If drainage is poor, fix this first.

**General Rules**

Dig a hole that is about twice as big as the pot or root ball. Place the plant in the hole and fill in around the roots by using a mixture of 50% peat moss and 50% good garden soil. When refilling the hole, be sure to pack the soil in around the roots, leaving a small basin shape for holding water. At this stage, it is important that a root starter formulation of fertilizer be used (i.e. Root Booster 5-15-5). If a stronger formulation is used, damage to the roots may occur. The use of manure at this stage is not recommended because root burning may occur. Trees should be planted with the graft at ground level. Trees should be staked or braced for the first year to prevent high winds from loosening them.

**Watering Instructions**

One of the most important aspects of home gardening is proper watering. Water is vital throughout a plant's life, but it matters most during its first days outdoors. If newly sown seeds dry out, they simply will not germinate. If newly planted trees and shrubs are not watered, they will dry up and die. Until a plant has been in the ground for a few years, its root system is too shallow and it simply does not seek the moisture that the plant needs.

**Water all newly planted plants daily until fall, every other day after that.** A depression at the base of the tree allows for water retention. If the weather is very hot and dry, water all young trees, shrubs and perennials that were planted in the previous 2 or 3 years. Lawn sprinklers rarely give enough water to penetrate to the deep roots. When the top 2 or 3 inches of soil around the trees are dry, water thoroughly. Very heavy clay soils require less watering and lighter sandy soils will require extra water. Deep watering with a root feeder or a drip irrigation system is very effective.

In late fall, water all plants thoroughly before the ground freezes. It is best for plants to go into the winter with a block of ice around their roots. This will allow the plant to have moisture around the roots as the ground thaws in spring.

**Wrapped Roots (Ball & Burlap)**

Some trees are prepared for transplanting with a root ball which is retained with burlap and string. Lift the tree by the root ball only and lower it into a hole which is wider and deeper than the root ball. The ball should be 2” below grade. Do not remove burlap as it will quickly decompose. All plastic strings should be cut away from near the trunk.

**Pruning**

Prune shade trees in early spring to promote new growth. Remove all dead, broken or diseased branches and all branches growing at very acute angles to the main stem. Make all pruning cuts flush with the parent limb and never leave a stub.

*Please note that height and width described are guidelines only. These numbers are at maturity and are subject to climate and growing conditions.*

*Exceptions - Maple and Birch trees should only be pruned once leaves are fully open in order to prevent excessive sap loss (late June).*
Manchurian Ash
*Fraxinus 'Mancana'*
Height: 12m (35-40’) Width: 8m (25’)

Northern Treasure Ash
*Fraxinus 'Northern Treasure'*
Height: 12m (35-40’) Width: 6m (20’)

Foothills Ash
*Fraxinus pennsylvanica ‘Heuver’*
Height: 15m (50’) Width: 8m (26’)

Prairie Spire Ash
*Fraxinus pennsylvanica*
Height: 15m (50’) Width: 9m (30’)

Back
**Dakota Pinnacle Birch**  
*Betula platyphylla ‘Fargo’*  
Height: 8m (26’)      Width: 2m (7’)

**Clump Birch**  
*Betula papyrifera*  
Height: 12m (35’)      Width: 8m (25’)

**Paper Birch**  
*Betula papyrifera*  
Height: 12m (35’)      Width: 8m (25’)

**Weeping Birch**  
*Betula pendula*  
Height: 45m (45’)      Width: 9m (30’)
Amur Cherry
*Prunus maackii*
Height: 9m (30’)  Width: 7m (23’)

Ohio Buckeye
*Aesculus glabra*
Height: 8m (25’)  Width: 6m (18’)

Parkland Pillar Birch
*Betula platyphylla ‘Jetpark’*
Height: 10m (30’)  Width:2m (6’)

Fall Gold Ash
*Fraxinus ‘Fall Gold’*
Height: 14m (45’)  Width: 8m (25’)
