www.lakeshoregardencentre.com

Revised January 2019

Prices range from \$99.99 - \$249.99. Prices are based on both size and species of tree. Trees range in height from approximately 6ft to 10ft.

For larger, specimen trees please inquire with the sales staff.

Shade Trees

****Prices and availability subject to change without notice****

	Average Height	Average Width	Flower Color	Fruit Color	Fall Color	Special Features
Ash	Ash is tough, hardy, drought tolerant and the first trees to change color in fall. Our ashes are all seedless varieties.					
Northern Treasure	12m (35-40')	6m (20')		None	Yellow	Oval-shaped crown, vigorous growth habit. Similar to Fall Gold Ash.
Patmore Green	14m (45')	9m (30')		None	Yellow	Retains leaves longer in fall. Extremely hardy. Excellent boulevard tree.
Prairie Spire	15-18m (50-60')	8-9m (25-30')		None	Yellow	Narrow form with glossy, wide, deep green leaves.

Birch	Birch are attractive trees with white bark & bright yellow leaves in fall. Prune only after tree is in full leaf (mid-July).					
Clump	12m (35-40')	8m (25')			Yellow	White bark, glossy foliage. Multiple trunks. Plant in a moist location.
Dakota Pinnacle	8m (26')	2m (7')			Yellow	Narrow columnar form. Develops white papery slightly exfoliating bark as it matures.
Paper	12m (35-40')	8m (25')			Yellow	Papery white bark & glossy foliage. Plant in a moist location.
Parkland Pillar	10m (30')	2m (6')			Yellow	Outstanding columnar Asian White Birch with dense, dark-green bark. Prefers well-drained soil with adequate moisture.
Weeping	14m (45')	9m (30')			Yellow	Graceful weeping branches. Plant in a moist location.

Buckeye						
Ohio	8m (25')	6m (18')	Yellow		Yellow	Small rounded tree with dark green, glossy foliage. Masses of yellow flowers in late spring.

Cherry	Great ornamental trees – white flowers in spring, colorful foliage, bark, and cherries. Attracts birds.					
Amur	9m (30')	7m (23')	White	Black	Amber	Dense, rounded tree with orange-brown, flanking bark
Ming	5m (15')	3.5m (10')	White	Black	Yellow	Uniformly upright growth habit. Panicles of white flowers in spring, yellow fall color and radiant reddish-bronze bark.
Robert's Purple Chokecherry	8m (25')	4m (12')	White	Black	Purple	Proven to be the only black knot resistant cherry. Green leaves in spring and fragrant white blossoms. Foliage turns dark purple over summer and into fall. Fruit is excellent for syrup and jelly.

	Average Height	Average Width	Flower Color	Fruit Color	Fall Color	Special Features
Elm						
Brandon	15m (40')	7m (20')	Yellow		Yellow	A fast-growing, vase-shaped, spreading tree with rough-toothed green foliage. Turns a beautiful yellow in fall.
Flowering Crab Lightly fragrant showy flowers in spring followed by decorative apples. Attracts birds.						
Candy Cane	6-8m (25')	5m (15')	Pink & White	None	Red & Yellow	Cross between a Gladiator and Spring Snow so a combination of pink and white flowers.
Courageous	5m (16')	2m (6')	Pink	None	Orange	Seedless variety that rarely produces ornamental fruit. New foliage is bronze-red in color and matures to orange in fall.
Gladiator	6m (20')	3m (9')	Pink	Purple	Purple	Glossy purple-green foliage. Upright growing. Very hardy. Very disease resistant. Develops unique bumps on trunk when older.
Purple Spire	5m (15')	2.5m (7')	Pink	Purple	Purple	Compact columnar crabapple with purple-green foliage. Good disease resistance. Intense fall color.
Royalty	5.5m (17')	5.5m (17')	Red-Purple	Red	Orange	Very hardy. Darkest purple leaves of all flowering crabs
Royal Beauty	1.5m (5')	1.5m (5')	Pink	Red	Red	Small weeping form with coppery-red foliage. Fruit does not drop.
Spring Snow	8m (25')	5m (15')	White	None	Yellow	Stunning oval shaped tree with dark green leaves, white flowers and no fruit.
Thunderchild	6-7m (20')	5m (15')	Rose Pink	Dark Red	Orange - Yellow	Green-bronze leaves turn purple in summer. Resistant to fireblight. A great choice.
Hawthorn Fragrant flowers, green glossy foliage and colorful fruit. Prefers well-drained soil. A great tree for a small yard.						
Snowbird	5.5m (18')	5m (15')	Double White	Red	Yellow - Orange	Upright tree with deeply lobed dark green foliage. Produces few berries. Very hardy.
Lilac						
Ivory Silk	6-8m (20-25')	6m (18')	Cream		Yellow	Fragrant clusters of flowers in mid-June. Cherry-like bark. Non-suckering.
Japanese Tree Form	8m (25')	6m (18')	Cream		Yellow	Fragrant clusters of flowers in early summer. Cherry-like bark.
Linden Tiny, fragrant yellow flowers in summer & heart-shaped leaves. A clean, low maintenance tree.						
Dropmore	15m (45')	10m (30')	Yellow		Yellow	Slow growing with dense pyramidal shape. Clean low maintenance tree. Hybrid between American and Little Leaf.
Harvest Gold	10m (30')	8m (25')	Yellow		Yellow	Upright growth habit. Exfoliating bark. Attractive, disease-free, glossy foliage.
Maple Each maple is unique – great fall color. Very adaptable trees. Prune only after it is in full leaf.						
Amur	5-6m (15-20')	4m (12')	Pale Yellow	Red	Scarlet	Small, adaptable tree. Grey bark & bright red, winged fruit. Tolerates most soils. Great for small yards.
Inferno Sugar	12m (36')	9m (27')	Yellow	Red	Red/Orange	Upright, rounded shape. Beautiful red-orange fall color. Prefers rich, well-drained soil.
Silver Cloud	15m (50')	9m (30')			Golden Yellow	Green lobed foliage that has a silvery underside.
Tatarian Hot Wings	6m (20')	6m (20')	Yellow	Red	Orange - Red	Medium small tree. Tolerant of alkaline and dry soils. An ideal smaller tree for most any landscape.
Mountain Ash Ornamental tree with white flowers, fern-like foliage and bright orange-red berries in late summer. Plant in well-drained soil.						
Pyramidal (European)	6m (20')	2m (7')	White	Orange-Red	Yellow - Red	Narrow upright slow growing tree with dark green foliage.
Oak						
Burr	15m (50')	12m (40')		Acorns	Amber	Lobed leaves. Thick, furrowed bark. Grows well in wet or dry conditions. Long-lived.
Majestic Skies – Northern Pin	20m (60')	12m (40')		Acorns	Red	
Olive						
Russian	8m (25')	6m (20')	Yellow	Olives	Silvery	Narrow, silvery foliage on thorny branches. Fragrant flowers in spring. Leaves last into December.

	Average Height	Average Width	Flower Color	Fruit Color	Fall Color	Special Features
Plum						
Nigra Muckle **New**	5m (15')	3.5m (10')	Pink	Red	Red	Small tree with outstanding flowers in spring. Hybrid between a Canadian Plum and a Russian Almond.
Poplar						
Fast growing, adaptable trees. Do not produce cotton or sticky seeds. Great for shelterbelts, acreages or large spaces.						
Swedish Aspen	12m (40')	2m (6')			Yellow-Orange	Columnar growth habit. Circular, dark green leaves with wavy edges. Excellent screen.
Willow						
Fast growing trees with arching branches.						
Silver	15m (50')	10m (33')			Silvery	Rapid growing with silver leaves. Arching golden branches provide a weeping effect. Older bark is dark grayish-brown and ridged.

Shelterbelts

	Height	Width	Special Features	Pot Size	1-9 plants	10-19	20+
Poplar							
Okanese Poplar	20m (60')	10m (30')	Excellent for wind breaks. Fast growing and resistant to disease.	#1 pot	\$16.99	\$14.99	\$12.99
Prairie Sky Poplar	25m (65-80')	7.5m (20')	Thoroughbred poplar. Fast growing and tolerant of worst growing conditions. Aggressive roots.	#1 pot	\$16.99	\$14.99	\$12.99
Sundancer Poplar	15m(40')	3.5m(15')	Hardy, fast growing crown-formed poplar. High disease and insect-resistance.	#1 pot #5 pot	\$16.99 \$49.99	\$14.99 \$39.99	\$12.99 \$39.99
Swedish Aspen	10m (30')	2m (6')	Columnar growth habit. Excellent screen	#1 pot #2 pot #5 pot	\$17.99 \$39.99 \$69.99	\$15.99	10+ \$24.99 10+ \$59.99
Tower Poplar	10m (30')	1.5m (5')	Columnar growth habit. Plant 1.2m (4') apart.	#1 pot #2 pot	\$16.99 \$24.99	\$14.99 \$19.99	\$12.99 \$14.99

Spacing for Shelterbelts:

Depending on the type of tree, the spacing for large trees such as Northwest and Okanese poplar should be about 8' apart or far enough apart to allow equipment to pass easily between the trees. The spacing for narrow poplars should be about 4-6'.

Planting Instructions Check your planting location for drainage before planting. If drainage is poor, fix this first. Dig a hole that is about twice as big as the pot or root ball. Remove plant from container. Place the plant in the hole and fill in around the roots by using a mixture of 50% peat moss and 50% good garden soil. When refilling the hole, be sure to pack the soil in around the roots, leaving a small basin shape for holding water. At this stage, it is important that a root starter formulation of fertilizer be used (i.e. Root Booster 5-15-5). If a stronger formulation is used, damage to the roots may occur. The use of manure at this stage is not recommended because root burning may occur. Trees should be planted with the graft at ground level. Trees should be staked or braced for the first few years to prevent high winds from loosening them.

Watering Instructions

One of the most important aspects of home gardening is proper watering. Water is vital throughout a plant's life, but it matters most during its first days planted. If newly planted trees and shrubs are not watered, they will dry up and die. Until a plant has been in the ground for a few years, its root system is too shallow and it simply does not seek the moisture that the plant needs.

Water all newly planted plants daily until fall, every other day after that. A depression at the base of the tree allows for water retention. If the weather is very hot and dry, water all young trees, shrubs and perennials that were planted in the previous 2 or 3 years. Lawn sprinklers rarely give enough water to penetrate to the deep roots. When the top 2 or 3 inches of soil around the tree is dry, water thoroughly. **Very heavy clay soils require less watering** and lighter sandy soils will require extra water. Deep watering with a root feeder or a drip irrigation system is very effective.

In late fall, water all plants thoroughly before the ground freezes. It is best for plants to go into winter with a block of ice around their roots. This will allow the plant to have moisture around the roots as the ground thaws in spring.

Wrapped Roots (Ball & Burlap)

Some trees are prepared for transplanting with a root ball which is retained with burlap and string. Lift the tree by the root ball only and lower it into a hole which is wider and deeper than the root ball. The ball should be 2" below grade. Do not remove burlap as it will quickly decompose. All plastic strings should be cut away from near the trunk.

Pruning

Prune shade trees in early spring to promote new growth. Remove all dead, broken or diseased branches and all branches growing at very acute angles to the main stem. Make all pruning cuts flush with the parent limb and never leave a stub. ***Exceptions - Maple and Birch trees should only be pruned once leaves are fully open in order to prevent excessive sap loss (late June).*

*Please note that height and width described are guidelines only.
These numbers are at maturity and are subject to climate and growing conditions.*
